Employee Management System

Complete User Capabilities & Use Cases

About This Document: This guide describes everything a user can do in this Employee Management System, organized by their role and what they need to accomplish.

✨ What Everyone Can Do

Features Available to All Users

- ✓ Login securely with email
- ✓ View your personal profile
- ✓ Update your information
- ✓ Apply for time off
- ✓ Check leave request status
- ✓ Submit support tickets
- ✓ Track ticket progress
- ✓ Use chat assistant

👤 Employee

Regular staff members managing their own work and requests

📋 Login to Your Dashboard

Start your day by accessing your personal employee workspace

1. Go to login page
2. Enter your email and password
3. Click Login
4. View your personalized dashboard

👤 View & Update Your Profile

See your employee details and keep your information current

1. Click on your profile in the dashboard
2. View your personal information
3. Edit fields like phone, address, email
4. Save changes

Information visible: Name, Email, Department, Role, Salary, Joining Date

📅 Apply for Time Off

Request leave for vacation, sick days, or other absences

1. Go to "Leave Management" section
2. Click "Apply for Leave"
3. Select leave type: Casual, Sick, or Earned
4. Choose start and end dates
5. Write a reason (e.g., vacation, medical appointment)
6. Submit request
7. See your request in "Pending" status

Available leave: Casual (6 days), Sick (8 days), Earned (10 days)

📊 Check Leave History & Status

Monitor all your past and pending leave requests

1. Go to "Leave Management"

2. View complete leave history
3. See status: Pending, Approved, or Rejected
4. Check remaining leave balance

🎫 Create Support Tickets

Request help for IT, HR, Payroll, or General issues

1. Go to "Support Tickets" section
2. Click "Create New Ticket"
3. Select category: IT, HR, Payroll, or Admin
4. Enter subject (title of your issue)
5. Write detailed description
6. Submit ticket
7. Receive confirmation and tracking ID

📝 Track Support Ticket Progress

Monitor the status of your support requests

1. Go to "Support Tickets" section
2. View all your tickets
3. Check status: Open, In Progress, or Closed
4. See history and updates

💬 Use Chat Assistant for Quick Help

Get help with common tasks using the AI-powered chat

1. Look for chat widget on the page
2. Click to open chat assistant
3. Choose quick actions: Apply Leave, Create Ticket, View Payslip
4. Or ask questions in natural language

Manager

Leads who approve team leave requests and manage team information

🔄 Review Pending Leave Requests

View all leave applications from your team members waiting for approval

1. Login to your manager dashboard
2. Go to "Leave Approval Queue"
3. See all pending leave requests grouped by employee
4. Check details: employee name, leave type, dates, and reason

✅ Approve Leave Requests

Approve team member requests to grant them time off

1. View pending leave requests
2. Review employee name and leave details
3. Click "Approve" button
4. Automatic email sent to employee confirming approval

❌ Reject Leave Requests

Decline leave requests when necessary

1. View pending leave requests
2. Click "Reject" button for request to deny
3. Automatic email sent to employee explaining rejection
4. Employee sees status updated to "Rejected"

🔍 Search & View Team Members

Find and view details about your team and other employees

1. Go to "Employee Directory"
2. Search by name, email, or department
3. Filter by department or role
4. View employee details in read-only mode

📊 View Employee Information

Access team member details for reference

1. Find employee in directory
2. View: name, email, department, role, salary, joining date
3. Note: You cannot edit (read-only access)

👥 HR (Human Resources)

HR specialists managing employee records, recruitment, and administration

➕ Add New Employee

Register a new team member in the system

1. Go to "Employee Management"
2. Click "Add New Employee"
3. Fill in the form with details:
    4. First Name and Last Name
    5. Email address (must be unique)
    6. Department (e.g., IT, Finance, Sales)
    7. Role (Employee, Manager, HR, Admin)
    8. Salary
    9. Joining date
10. Click "Save"

11. Welcome email automatically sent to new employee

✏️ Edit Employee Information

Update employee details whenever information changes

1. Find employee in database
2. Click "Edit"
3. Modify any field needed:
    4. Name, email, department, role, salary, joining date
5. Save changes

🗑️ Delete Employee Records

Remove employee records from the system (e.g., during offboarding)

1. Find employee in database
2. Click "Delete"
3. Confirm deletion (cannot be undone)
4. Employee record removed from system

🔍 Search Employees with Advanced Filters

Find employees using multiple search criteria

1. Go to "Employee Management"
2. Use search bar to find by:
    3. Name, email, department, role, or salary
4. Filter results by department or role
5. Sort by any column (name, email, salary, etc.)
6. View paginated results (6, 12, 24 employees per page)

📊 View Employee Directory & Metrics

Get an overview of your workforce

1. Go to "Employee Management"
2. See total staff count
3. View number of departments
4. Browse employee cards with all details

📋 View Leave Requests

Monitor all leave applications across the organization

1. Access leave management reports
2. View all pending, approved, and rejected leaves
3. Filter by employee, date range, or status

🔐 Administrator

System administrators with full control and access to all features

🔑 Reset Employee Passwords

Help employees who forgot their passwords or need new ones

1. Go to "Password Reset" section
2. Enter employee email address
3. Generate new temporary password
4. Click "Reset"
5. New password emailed to employee
6. Employee can use new password to login

🔐 Full System Access

Access all HR and manager functions plus admin features

1. Have complete access to everything in the system
2. All HR capabilities: add, edit, delete employees
3. All Manager capabilities: approve/reject leaves
4. Plus admin-only features: password reset

👥 Advanced Employee Management

Full control over employee records and system administration

1. Add new employees with all details
2. Edit any employee information
3. Delete employee records
4. Search and filter any way needed
5. View complete employee database

📊 Complete Capability Matrix

Here's a quick reference showing what each role can do:

Feature	Employee	Manager	HR	Admin
Login	✓	✓	✓	✓
View Own Profile	✓	✓	✓	✓
Edit Own Profile	✓	✓	✓	✓
Apply for Leave	✓	✓	✓	✓
View Own Leave History	✓	✓	✓	✓

Feature	Employee	Manager	HR	Admin
Create Support Tickets	✓	✓	✓	✓
View Own Tickets	✓	✓	✓	✓
View All Employees	✗	✓	✓	✓
Search Employees	✗	✓	✓	✓
Add Employee	✗	✗	✓	✓
Edit Employee	✗	✗	✓	✓
Delete Employee	✗	✗	✓	✓
Approve Leave	✗	✓	✗	✗
Reject Leave	✗	✓	✗	✗
Reset Password	✗	✗	✗	✓

🔄 Key Workflows in Action

1️⃣ Typical Leave Approval Workflow

Employee applies for leave → Request marked "Pending" → Manager reviews → Manager approves or rejects → Employee notified via email → Status updated in system

2️⃣ New Employee Onboarding Workflow

HR adds new employee → System creates account → Welcome email sent → Employee can login → Employee updates their profile

3️⃣ Support Ticket Process

Employee creates ticket → Ticket opens in system → Support team gets notification → Support works on issue → Status updates to "In Progress" → Ticket closes when resolved

💡 System Benefits

For Employees

- Self-service leave management
- Real-time request status
- Easy support ticket submission
- Online profile updates

For Managers

- Quick leave approvals
- Team directory access
- Automated notifications
- Streamlined workflows

For HR

- Complete employee database
- Advanced search & filtering
- Automated onboarding emails
- Centralized management

For Admin

- Full system control
- Password management
- Access to all data
- System administration

📌 **Important Notes:**

- **Email Notifications:** The system sends automatic emails for leave approvals/rejections, new employee onboarding, and password resets
- **Leave Balance:** Casual (6 days), Sick (8 days), Earned (10 days) per year
- **Role-Based Access:** Each user sees only what's appropriate for their role
- **Real-time Status:** All request statuses update instantly

System Configuration:

Frontend: Angular 21 (http://localhost:4200) | Backend: Spring Boot 4.0.1 (http://localhost:8080)
